

Press release

tk accelis expands India operations to support aerospace growth

The Supply Chain Solutions business of tk accelis, a global provider of materials, integrated supply chain management and logistics services, has completed a multimillion-dollar investment in the expansion of its Bengaluru operations, strengthening its position as a key enabler of India's rapidly growing aerospace sector.

The investment has expanded warehouse capacity, operational capabilities and supporting infrastructure at the company's Bengaluru site, also creating new skilled jobs in the region. The expansion reflects increasing customer demand, accelerating aerospace production activity across India, and the global industry's continued shift toward more geographically diverse and resilient supply chains.

Located within the Bengaluru Aerospace Special Economic Zone, the facility serves aerospace manufacturers through material supply, processing and advanced supply chain services. With its origins in India dating back to 2015, tk accelis Supply Chain Solutions helped establish the foundation for modern aerospace material management and supply chain support in one of the world's fastest-growing aviation markets.

"India is becoming an increasingly important part of the global aerospace ecosystem," said Gopi Hanumanthappa, Managing Director, tk accelis Supply Chain Solutions India Pvt Ltd. "This investment demonstrates our long-term commitment to the market and to our customers. Having pioneered dedicated aerospace materials management in India in the past, we are proud to continue investing in the country's future."

The expansion is strengthening supply chain resilience for aerospace manufacturers by bringing materials, inventory management and logistics capabilities closer to production centers. The expansion further reinforces tk accelis Supply Chain Solutions' strategy of delivering integrated, end-to-end supply chain solutions that combine materials expertise, logistics excellence and digital supply chain capabilities.

With India increasingly attracting aerospace manufacturing investment from OEMs and Tier 1 suppliers, the enlarged Bengaluru operation positions tk accelis Supply Chain Solutions at the center of one of the industry's most dynamic growth stories.

About tk accelis

tk accelis is a global leader in materials distribution and services across the entire supply chain. tk accelis combines three fields of activity in a seamless offering: materials distribution & trading, customized processing, and supply chain management. With a growing range of data-driven services, tk accelis is consistently driving the digitalization of supply chains.

A part of tk accelis' Solutions business, tk accelis Supply Chain Solutions is a provider of supply chain management and logistics services (3PL/4PL). The team develops tailored, end-to-end solutions that enable customers to build resilient, agile, and digitally connected supply chains. With more than 100 locations across 15 countries and a workforce of over 3,400 employees, tk accelis Supply Chain Solutions supports customers worldwide. At the core of its service portfolio is the Global Control Tower (GCT), a modular service offering that allows customers to combine and configure the capabilities they need to address their specific supply chain challenges. tk accelis Supply Chain Solutions focuses on the aerospace and defense, automotive, electric mobility, industrial manufacturing, and renewable energy industries.
