

thyssenkrupp Materials Services continues growth in North America with new location in New Mexico

- thyssenkrupp Materials Services opens metal service center in Santa Teresa
- Strategic expansion in border region strengthens supply chain network in USA and Mexico
- Metal processing capabilities for customers in the energy distribution sector expanded

thyssenkrupp Materials Services is expanding its portfolio of metal and plastics service centers in North America with a new plant in Santa Teresa, New Mexico. The plant will focus on the processing and distribution of metals and serve customers in the United States and Mexico. The expansion is supported by the New Mexico Economic Development Department (EDD), which is providing economic incentives to promote job growth and workforce development in the region. Production will begin in the near term, creating approximately 90 new jobs in the U.S.-Mexico border region.

Copper and Brass Sales, a division of thyssenkrupp Materials North America, has leased an 8,000-square-meter plant for processing metal for components used in power distribution. The company already operates five production centers in North America: Toronto, Montreal, Vancouver, Atlanta and Saltillo in Mexico. The focus of the metal service center in Santa Teresa is on manufacturing solutions tailored to customer-specific needs. These include complex cutting, kitting and just-in-time services. The new location underscores Copper and Brass Sales' commitment to providing customized, high-quality solutions that improve production processes and reduce lead times.

“Expanding into New Mexico is a strategic move that strengthens our ability to serve power distribution customers across North America and Mexico with greater efficiency and responsiveness,” said James Patsakos, President of Manufacturing Services at thyssenkrupp Materials NA. “Santa Teresa offers the ideal location, infrastructure, and workforce to support our long-term growth while enhancing supply chain resilience for our customers. The support from the State of New Mexico through LEDA and JTIP demonstrates a shared commitment to economic development, and we look forward to building a strong presence in the region as we grow our team and operations.”

About thyssenkrupp Materials Services

thyssenkrupp Materials Services is one of the world's leading mill-independent materials distribution and service providers, with around 380 locations in more than 30 countries, mainly in the core markets of Europe and North America. In fiscal year 2023/24 the company generated sales of €12.1 billion and earnings of €204 million with around 16,000 employees. The broad range of services offered by the materials experts enables customers to focus even more on their individual core businesses. With its “Materials as a Service” strategy, the company combines the distribution of materials and raw materials with data-driven supply chain management products and services. Digital solutions ensure efficient,

resilient and resource-conscious supply chains for customers, thus providing the basis for sustainable operations. Materials Services is committed to becoming climate-neutral by 2030.
