

thyssenkrupp Materials Services further expands capacities in Eastern Europe

thyssenkrupp Materials Hungary, a company of the Materials Services business area, has further expanded its site in the Hungarian capital Budapest. Within ten months, a new warehouse and processing hall was built on an area of around 6,500 square meters. The hall was specially built for the storage and processing of plastics and is specially tempered for these thanks to state-of-the-art technology. In total, the Hungarian central warehouse offers over 80,000 square metres of storage and processing space to meet the needs of its customers.

"We have continuously expanded the site in recent years and have invested a total of over 70 million euros. We consistently continue along this path in the interests of our customers. We are increasingly noticing that the requirements of our partners are becoming more and more complex. By investing in technology and the infrastructure of our branch, we are able to meet our customers' challenges with individual services and ensure that they can concentrate fully on their core business," says Zoltan Petr , Managing Director of thyssenkrupp Materials Hungary.

Materials Services in Eastern Europe

Materials distribution is one of the leading materials and processing specialists in Eastern Europe. With companies in Poland, the Czech Republic, Hungary, Slovakia, Romania, Serbia, Bulgaria and Turkey and sales offices in Croatia and Lithuania, thyssenkrupp has an almost unique materials trading network in the region.

The product portfolio includes rolled and stainless steel, nonferrous metals, plastics and pipes. Furthermore, the company offers customized services such as slitting and cut-to-length, laser and plasma cutting and sophisticated surface treatments for all products. The range of services is rounded off by just-in-time deliveries, customer consulting and individual supply chain services. A total of almost 2,000 employees work in 46 locations to meet the needs and requirements of customers.

About thyssenkrupp Materials Services

With around 480 locations – 271 of them warehousing locations – in over 40 countries, thyssenkrupp Materials Services is the biggest materials distributor & service provider in the western world. The wide-ranging capabilities offered by the materials experts enable customers to concentrate more on their individual core business and span two strategic areas: global materials distribution as a one-stop-shop – from steel, tubes and pipes, nonferrous metals and specialty materials to plastics and raw materials – and tailored services in the areas of materials management and supply chain management. An extensive omnichannel architecture offers 250,000 customers worldwide round-the-clock access to more than 150,000 products and services. A high-performance logistics system ensures that all deliveries are integrated smoothly into customer production processes on a just-in-time or just-in-sequence basis.
