thyssenkrupp Materials Services to invest 60 million euros in new logistics center in Rotenburg

On September 11, 2018 thyssenkrupp Schulte, a company of thyssenkrupp Materials Services, and the town of Rotenburg/Wümme (Lower Saxony) signed a purchase agreement for a 100,000 square meter plus industrial site. The groundbreaking for the construction of a new logistics center on the site with up to 50,000 square meters of storage space – roughly the size of seven soccer fields – is planned for summer 2019. thyssenkrupp Materials Services will invest around 60 million euros in this state-of-the-art facility, which is scheduled to go into operation in 2021 and will have the capacity to store over 18,000 tons of materials such as aluminum, stainless steel and carbon steel.

“Our aim is to be close to our customers, offer them professional advice and provide them with tailored materials and supply chain solutions,” said Ilse Henne, CEO of thyssenkrupp Schulte. “Located strategically between Bremen, Hanover and Hamburg, Rotenburg offers the ideal conditions for this.” Existing warehouses in Hamburg and Bremen will be integrated into the new site in Rotenburg. By offering all articles from one location, thyssenkrupp Schulte will be able to guarantee maximum material availability and serve its customers even more efficiently. State-of-the-art processing equipment and digital integration will ensure flexible and perfectly coordinated logistics processes and services.

“The new site is a further important element in our growth strategy,” said Joachim Limberg, CEO of thyssenkrupp Materials Services. “The new logistics center will underline our ambition to be the best possible partner to our customers: We guarantee the reliability and quick availability of our products so that our customers can concentrate on their core business.”

The town of Rotenburg/Wümme also supports the company’s aims: “We are pleased that the negotiations with thyssenkrupp Schulte, the property owners, EVB and the Bundeswehr administration were successful,” said Rotenburg’s mayor Andreas Weber. “This perhaps somewhat unusual settlement of such a company will also further advance Rotenburg as an efficient medium-sized center. I would like to thank everyone involved”.

thyssenkrupp Schulte GmbH is a materials partner for carbon and stainless steels and nonferrous metals, providing made-to-measure products for over 70,000 customers in industry, construction and the trades. The company has a broad range of flat products, sections and tubes for all requirements which can be cut to customer specification.

Closeness to partners is another key advantage: With over 40 sites in Germany, thyssenkrupp Schulte is always close at hand and can serve customers throughout the country quickly and reliably. A wide product range, professional advice and extensive services round out the portfolio of Germany's biggest materials distributor.

About thyssenkrupp Materials Services

With around 480 locations in over 40 countries, thyssenkrupp Materials Services is the biggest materials distributor and service provider in the western world. The wide-ranging capabilities offered by the materials experts enable customers to concentrate more on their individual core business and span two strategic areas: global materials distribution as a one-stop shop – from steel, tubes and pipes, nonferrous metals and specialty materials to plastics and raw materials – and tailored services in the areas of materials management and supply chain management. An extensive omnichannel architecture offers 250,000 customers worldwide round-the-clock access to more than 150,000 products and services. A high-performance logistics system ensures that all deliveries are integrated smoothly into customer production processes on a just-in-time or just-in-sequence basis.
